Comments

Great testimony!

Keynote address didn't connect with STEM

Wasn't sure how connected to STEM other than the companies they were from.

Invite Jeffers group, Outside Ed - booth...

This is a well-organized conference - efficiently run from the intro to the wrap-up; inspiring

Toni was easy to listen to and encouraging to teachers

Keynote was good, however it would have been better if it was more about using STEM in the classroom.

Great ideas from MakerSpace Session!

Liked listening to the keynote

I thought the presentations were a little misleading from the descriptions given

I felt as though the keynote lacked focus

I really appreciated Beth's comments about students who study STEM don't have to be physicists - they can be anything they want.

I would have preferred a keynote from an educator. There are so many inspiring educators who blog/tweet/present at conferences.

Ms. Adafin was great! Her point about influence was very important and also her point about communicating with parents was very poignant as well

Great thoughts

Keynote was okay but not great. Too much personal info.

Happy to be here. Glad to see old friends and make new friends. :)

I loved Toni's speech. I also liked the quote Elisa shared, "Teaching is the one profession that creates all other professions."

It was kind of unclear what Toni was trying to convey to audience.

A little long

All were excellent

Keynote talked too much about herself.

Lighting (harsh) and sound (echo) could be improved

I think the workshops were great. If you cut the intro time, teachers could get out earlier and avoid traffic (there was too much time between sessions.)

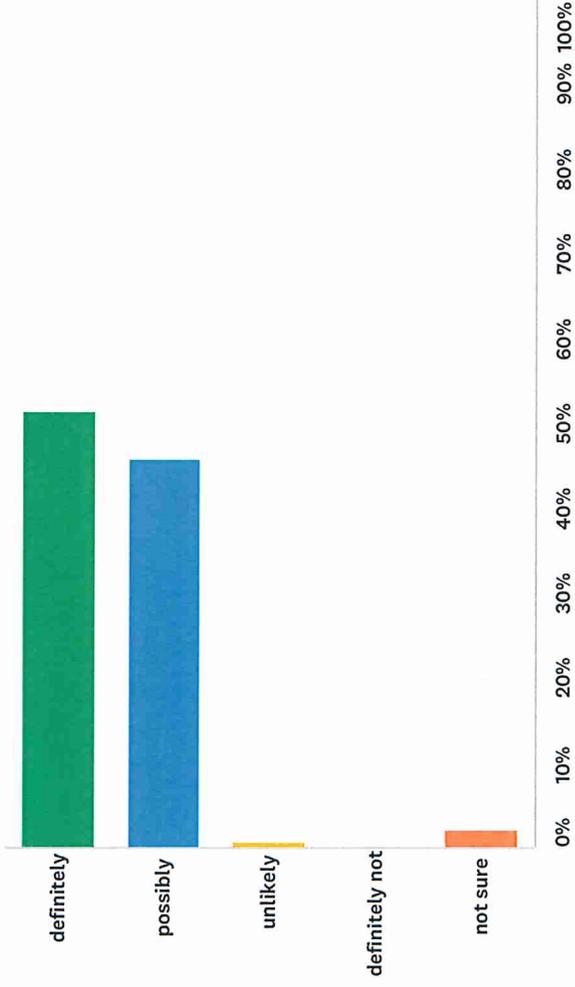

Awesome

Keynote was a good person, but more content or learning would have been nice.

Very strong

Q8 how likely to attend a future STEM conference?

Answered: 140 Skipped: 3

ANSWER CHOICES	RESPONSES
definitely	72 51.43%
possibly	64 45.71%
unlikely	1 0.71%
definitely not	0 0.00%
not sure	3 2.14%
TOTAL	140
