

Dear Educator,

We'd like to invite you and your students to experience STEM learning at The Works Museum—where kids explore, design, and build while learning the fundamentals of engineering, science, and technology. Our programs are designed for students ages 4-12 and offer hands-on experiences that support Minnesota K-12 Academic Science Standards. Whether you're looking for an educational field trip or an in-class experience, we offer a variety of options to fit your teaching goals.

### INSPIRE STUDENTS WITH:

- **Museum Field Trips** for hands-on exploration with interactive exhibits
- **In-School Workshops** led by our educators, with all materials provided
- **Family Engineering Nights** to engage your whole school community
- **Video Workshops** with shipped supplies and on-demand lessons

Enjoy 10% off when you book a program taking place between September 1 and December 31, 2025. Just mention the Minndevelopment STEM Education conference discount on the online request form.

Book your program or learn more via the QR code below. Email [katy@theworks.org](mailto:katy@theworks.org) with questions. We're here to help you plan a visit or program that supports your students' learning in a fun and meaningful way. We hope to engineer together soon!

Sincerely,  
The Works Museum
